

IN THE SPECIFICATION

✓ Please amend the title of the invention to read --
RECORDING MEDIUM CAPABLE OF MANAGING GROUPS OF TRACKS
RECORDED THEREON--.

IN THE CLAIMS

✓✓ Please amend claims 1-3 by rewriting same to read
as follows and add new claim 33.

1. (Twice Amended) A recording medium in which a
plurality of programs are recorded and registered in a
plurality of groups, comprising:

a program recording area for recording the plurality
of programs; A

a first management data area for recording first
management data for managing a recording position
C corresponding to each of the plurality of programs; and

B a second management data area for recording second
management data for managing program names corresponding to
the plurality of programs, group names corresponding to the
plurality of groups, range information representing program

numbers included in each of the groups, [and separating information for separating each of the group names.

21 --2. (Twice Amended) The recording medium according to claim 1, wherein the range represents a first track number and a last track number forming a predetermined group.

--3. (Twice Amended) The recording medium according to claim 1, wherein a recording medium name identifying the recording medium is further recorded in the second management data area.

22 --33. (New) The recording medium according to claim 1, wherein the separating information separates the range information from a subsequent group name.--
